# PANDAS SERIES WITH TEN RANDOM NUMBERS

## 1. Simple Algorithm

1. Start the program.
2. Import the Pandas library as **pd** and NumPy as **np**.
3. Generate ten random numbers between 1 and 100 using **np.random.randint()**.
4. Create a Pandas Series using the generated numbers.
5. Display the Pandas Series.
6. Display the first number of the Series.
7. Display the last number of the Series.
8. Display the number of values in the Series.
9. Calculate and display the sum of all values.
10. Calculate and display the mean of all values.
11. Stop the program.

## 2. Flowchart

START
Import Pandas and NumPy
import pandas as pd
import numpy as np
Generate 10 random numbers
np.random.randint(1, 101, 10)
Create Pandas Series
series = pd.Series(numbers)
Display the Series
Display first, last and
number of values
Calculate and display
Sum and Mean
END

# 3. Simple Python Program

Beginner-friendlycodeforcreatingaPandasSeries with ten random numbers:

```
import pandas as pd
import numpy as np

# Generate 10 random numbers
numbers = np.random.randint(1, 101, 10)

# Create a Pandas Series
series = pd.Series(numbers)

# Display the Series
print("Pandas Series:")
print(series)

#     Display     basic     information
print("First  number:",  series.iloc[0])
print("Last  number:",  series.iloc[-1])
print("Number of values:", len(series))

# Simple operations
print("Sum:", series.sum())
print("Mean:", series.mean())
```

main.py

Visualize

Run

```python
import pandas as pd
import numpy as np

# Generate 10 random numbers
numbers = np.random.randint(1, 101, 10)

# Create a Pandas Series
series = pd.Series(numbers)

# Display the Series
print("Pandas Series:")
print(series)

# Display basic information
print("First number:", series.iloc[0])
print("Last number:", series.iloc[-1])
print("Number of values:", len(series))

# Simple operations
print("Sum:", series.sum())
```

Search

Output

```
Pandas Series:
0    80
1    99
2    13
3    46
4    32
5    56
6    73
7    43
8    20
9    74
dtype: int64
First number: 80
Last number: 74
Number of values: 10
Sum: 536
Mean: 53.6
```
